

## Jaén – Priego de Córdoba

1. Going out of Jaén taking the road A-316 direction to Torredelcampo.
2. Going towards Martos and then continuing until the crossing of the roads A-316 with the N-432.
3. Being on the crossing, go towards Baena, Málaga and/or Córdoba. (on the right side).
4. After two kilometres, taking the right crossing of the roads N-432 with the A-333.
5. The tour mentioned from the road A-333 up to Priego is of approximately 17km.

To take into account:

- a) The crossing of the roads A-316 with the N-432 and the last one with the A-333. In the last crossing there is just one signposting towards Priego de Córdoba.
- b) The several shady curves in the last kilometres of the road A-333.
- c) It is not necessary to go into the cities of Torredelcampo or Martos.
- d) Being already at Priego's municipal term, there are four possible incomes to accede to the urban core, the first one (towards the left side) and the second one (towards the right side) are the most recommendable.
- e) To enjoy the landscape of: La Peña de Martos (The famous mountain of Martos), el Puente de San Juan (The provincial limit between Jaén and Córdoba), and the Angosturas's gorge.

Distance: 75 kilometers approximately.

*Have a nice trip and remember to rest enough and do not take copious food*
