

1. Going out of Madrid taking the motorway A-4 direction to Andalucía.
2. Taking the motorway A-44 near Bailen direction to Jaén-Granada.
3. Going towards Jaén and then taking the A-316 direction Torredelcampo.
4. Going towards Martos and then continuing up to the crossing of the A-316 with the N-432.
5. Being on the crossing, go towards Baena, Málaga and/or Córdoba (on the right side).
6. After two kilometres, taking the right crossing of the roads N-432 with the A-333.
7. The tour mentioned from the road A-333 up to Priego is of approximately 17km.

To take into account:

- a) The possible speedings in the straight lines of La Mancha.
- b) The gorges, the curves and the bad condition of the asphalt in the Natural Park of Despeñaperros.
- c) The junction of Bailen.
- d) The crossing of the roads A-316 with the N-432 and the last one with the A-333. In the last crossing there is just one signposting towards Priego de Córdoba.
- e) The several shady curves in the last kilometres of the road A-333.
- f) Being already at Priego's municipal term, there are four possible incomes to accede to the urban core, the first one (towards the left side) and the second one (towards the right side) are the most recommendable.
- g) To enjoy the landscape of: Despeñaperros, la Peña de Martos (The famous mountain of Martos), El Puente San Juan (The provincial limit between Jaén and Córdoba) and the Angosturas's gorge.

Distance: 400 km approximately.

*Have a nice trip and remember that the most important thing is to arrive safely*
